EXECUTIVE SUMMARY

Lewis Consulting Group (LCG) has completed Limited Transaction Screen Assessment for the Site located at 148 Hawthorne Avenue (Block 3578, Lot 78) in the City of Newark, Essex County, New Jersey.

This assessment has revealed the following *potential environmental conditions* (PECs) identified in connection with the Site.

PEC	Summary
Potential for Underground Storage Tanks (UST)	According to a review of historic documents, the Site was developed between at least 1908 and 2003. No specific information was identified regarding the heating system for the structure formerly located on the Site. A site-wide geophysical survey utilizing ground-penetrating radar (GPR) should be completed of accessible areas to determine the presence or absence of USTs in connection with the Site.
NJDEP PI# 723936 & Former Historic Service Station/Auto Repair/Garage – Adjacent Property	Based on a review of NJDEP records, the adjacent property to the east located at 142-146 Hawthorne Avenue is an active NJDEP Site Remediation Program (SRP) case designated with Program Interest (PI) Number 723936 and Case Number 16-06-23-1543-39 related to USTs. Eight (8) USTs have been removed from the adjacent property and a Licensed Site Remediation Professional (LSRP) is retained. The case is currently open/active and out of compliance with the NJDEP. Timeframes have been missed including the completion of a Remedial Investigation/Remedial Action (RI/RA). According to a review of historical information, a service station/auto repair/garage formerly operated on the adjacent property to the east located at 142-144 Hawthorne Avenue from approximately 1927 through 2009. Further investigation should be completed to determine if the active SRP case and former service station/auto repair/garage has adversely impacted the Site.

1.0 INTRODUCTION

1.1 Purpose

The purpose of this Limited Transaction Screen Assessment to identify *potential environmental concerns* in connection with the property and to define a good practice in the United States of America for conducting a transaction screen for a parcel of commercial real estate where the user wishes to conduct limited environmental due diligence (that is, less than a *Phase I Environmental Site Assessment*) consistent with the American Society of Testing Materials (ASTM) Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528-14).

Potential environmental concerns (PECs) are defined as the possible presence of any hazardous substances or petroleum products on a property under conditions that indicate the possibility of an existing release, a past release, or a threat of a future release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws.

This practice will not satisfy the requirement to conduct *all appropriate inquiries* into the previous ownership and uses of the property consistent with "generally accepted good commercial and customary standards and practices" as defined in 42 U.S.C. §9601(35)(B) to qualify for one of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Landowner Liability Protections (LLPs). Users who desire to conduct environmental due diligence to qualify for one of the CERCLA LLPs should conduct assessment activities in conformity with "Standards and Practices for All Appropriate Inquiries," 40 C.F.R. Part 312, ASTM E1527: Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process or ASTM E2247: Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process for Forestland or Rural Property.

1.2 User Reliance

This assessment has been prepared on behalf of and for use Invest Newark for use in the environmental evaluation of the Site. This report and the findings contained herein may not be disseminated or conveyed to any other party, or used by any other party in whole or in party without the prior consent of Invest Newark. Notwithstanding anything to the contrary herein, any third-party reliance is limited to the agreed upon scope of worth by and between Invest Newark and Lewis Consulting Group (LCG).

3.4 Historic Uses of the Site

According to a review of historic information, the Site was historically utilized for residential purposes. The earliest resource was the 1908 Sanborn Map in which the Site is depicted as developed with a three-story residential building situated along Hawthorne Avenue.

By 2006, the residential building was demolished and the Site has remained as vacant land to present-day.

Year(s)	Property Use

West	At least 1908 to Present	Residential property

4.0 SITE RECONNAISSANCE

A visual site reconnaissance was conducted on May 4, 2021 of exterior portions of the Site to identify *PECs*. The following environmental conditions were observed on exterior portions of the Site during the Site walk-through.

Property ID	Site Observations
Exterior Conditions	• Areas of miscellaneous rubbish were observed throughout exterior portions of the Site.
Interior Conditions	N/A
Hazardous Substances in Connection with Identified Uses	• No hazardous substances were observed on-site.
Underground or Aboveground Storage Tanks (UST/AST)	• No visual evidence of an underground storage tank (UST) or aboveground storage tank (AST) was observed.
Polychlorinated Biphenyls (PCB)	• No electrical or hydraulic equipment known to contain polychlorinated biphenyls (PCBs) or likely to contain PCBs were observed.
Solid Waste Disposal	• No dumpsters were identified on-site.

5.0 OTHER ENVIRONMENTAL CONSIDERATIONS

5.1 Asbestos-Containing Materials

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. Common asbestos-containing materials (ACM) include pipe-covering, plaster, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications.

Currently, there are no improved structures associated with the Site and LCG could not confirm the presence/absence of asbestos-containing materials (ACM). Due to the Site consisting of vacant land, ACM is not an issue of concern.

5.2 Lead-Based Paint

Many buildings constructed before 1978 have paint that contains lead. Lead from paint, chips and dust can pose health hazards, especially in young children.

Currently, there are no improved structures associated with the Site and LCG could not confirm the presence/absence of lead-based paint (LBP). Due to the Site consisting of vacant land, LBP is not an issue of concern.

5.3 Radon

No samples were taken as part of this study to confirm the presence of radon. However, information regarding radon levels in Essex County, New Jersey was obtained from the EPA as well as the EDR report. EPA's Map of Radon Zones assigns each county in the U.S. to one of following three zones based on radon potential:

Zone 1	*counties have a predicted average indoor radon screening level greater than 4 pCi/L*	***Highest Potential***
Zone 2	*counties have a predicted average indoor radon screening level between 2 and 4 pCi/L*	***Moderate Potential***
Zone 3	*counties have a predicted average indoor radon screening level less than 2 pCi/L*	***Low Potential***

Essex County is identified within EPA Zone 2 indicating an average indoor radon screening level >= 2 picocuries per liter (pCi/L) and <= 4 pCi/L. According to information obtained through EDR, the City of Newark underwent 1,554 separate radon tests where approximately 4% of the samples resulted in a reading > 4 pCi/L.

6.0 CONCLUSIONS AND RECOMMENDATIONS

LCG has performed this Limited Transaction Screen Assessment in conformance with the scope and limitations of ASTM Practice E1528-14 of the Site located at 148 Hawthorne Avenue identified as Block 3578, Lot 78 in the City of Newark, Essex County, New Jersey.

This assessment has revealed the following *potential environmental conditions* (PECs) identified in connection with the Site and are summarized below.

6.1 Potential for Underground Storage Tanks

According to a review of historic documents, the Site was developed between at least 1908 and 2003. No specific information was identified regarding the heating system for the structure formerly located on the Site.

A site-wide geophysical survey utilizing ground-penetrating radar (GPR) should be completed of accessible areas to determine the presence or absence of USTs in connection with the Site.

6.2 NJDEP PI# 723936 & Former Historic Service Station– Adjacent Property

Based on a review of NJDEP records, the adjacent property to the east located at 142-146 Hawthorne Avenue is an active NJDEP Site Remediation Program (SRP) case designated with Program Interest (PI) Number 723936 and Case Number 16-06-23-1543-39 related to USTs. Eight (8) USTs have been removed from the adjacent property and a Licensed Site Remediation Professional (LSRP) is retained. The case is currently open/active and out of compliance with the NJDEP. Timeframes have been missed including the completion of a Remedial Investigation/Remedial Action (RI/RA).

According to a review of historical information, a service station/auto repair/garage formerly operated on the adjacent property to the east located at 142-144 Hawthorne Avenue. The adjacent property is listed in the EDR Historic Auto database as detailed below:

Location	Year	Name	Type
142 Hawthorne Avenue	1927	Schwartz Herman	Automobile Garages
144 Hawthorne Avenue	1932	Hawthorne Garage	Automobile Garages
	1937, 1942	Hawthorne Petroleum	Gasoline and Oil Service Stations
	1947, 1951	Bernhardt Super Service	Gasoline Stations
	1975-1980 1982, 1983, 1985-2009	Champ Auto Repair	General Automotive Repair Shop

Further investigation should be completed to determine if the active SRP case and former service station/auto repair/garage has adversely impacted the Site.

7.0 DISCLAIMER

The report is also based on information supplied to LCG regarding prior use of and activities on the property. Although we have exercised due care in analyzing and presenting the information and have no reason to believe it is inadequate or inaccurate, LCG is not responsible for any conditions not disclosed in the course of our walk-through or research. In addition, LCG is not responsible for representations or supporting information developed, reviewed or provided by persons other than LCG.

LCG's observations, findings, and opinions must not be considered as scientific certainties, but rather as opinion based on our professional experience and judgment concerning the significance of the data gathered during the course of the report. Specifically, LCG does not, and cannot, represent that the Site contains no hazardous or toxic materials, asbestos, or other latent conditions beyond that observed by LCG during its Site inspection, or conveyed through documents reviews for the Site.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/30/2020 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/14/2020 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

NJ HWS RE-EVAL: The locations were removed from the Known Contaminated Sites list for a variety of reasons. Some of the sites were taken off the list because they were inactive, some were not assigned a case worker and some were no longer contaminated. Inspectors from the DEP are now undertaking a full re-evaluation of each of the locations statewide. That includes visual and environmental tests to see whether contamination still exists.

A review of the NJ HWS RE-EVAL list, as provided by EDR, and dated 09/20/2007 has revealed that there are 6 NJ HWS RE-EVAL sites within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 9 EDR Hist Auto sites within approximately 0.125 miles of the target property.
